

WARNING.

- 1 Failure to comply with these procedures will invalidate glazing guarantee.
- 2 We reserve the right to charge for any site visit / rectification for works carried out due to dropped side hung windows & doors through the absence or incorrect positioning of glazing packers.

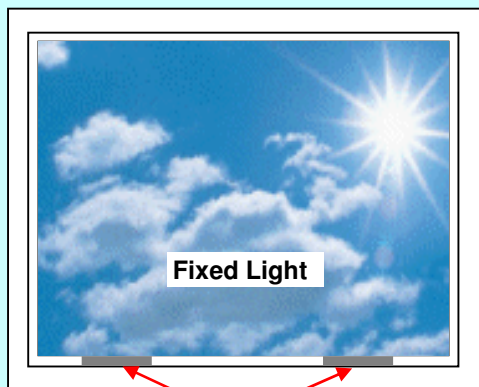

Here is an example of a packer covering both sheets of glass
Shown in RED

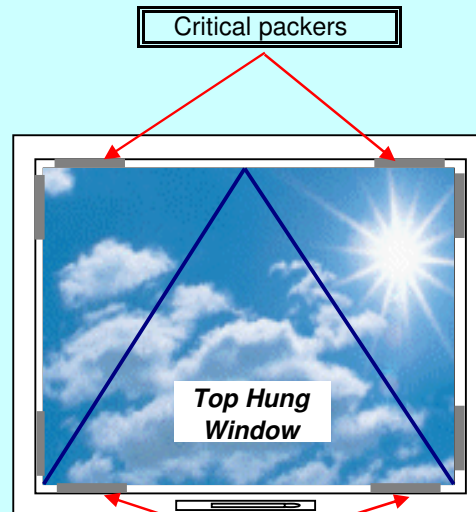

Normal glass packer (grey) used to level out glass units and pack out against frames to maintain a rigid square

Bridge packer (white) Levels out glazing platform and does not block passage of water to drainage slots

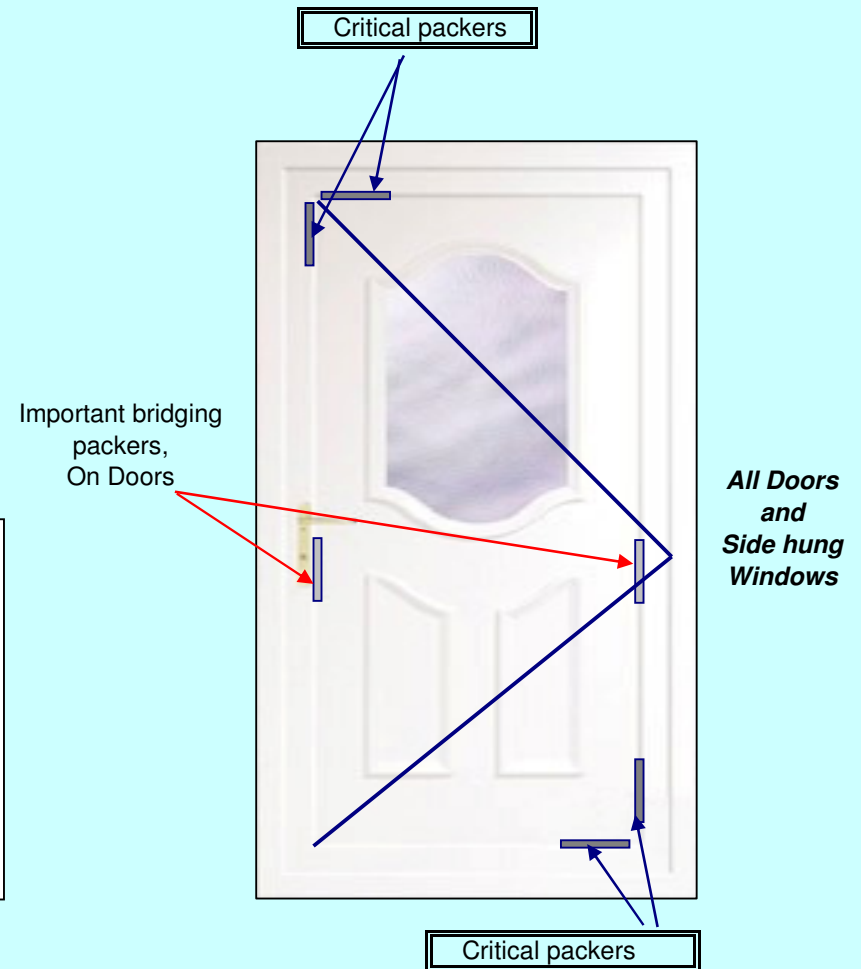

Example of drainage

Critical packers

Critical packers

Further packers may be required but not supplied
